Tank Replacement Service from Sarena

Bespoke turnkey contracting service tailored around clients' requirements

The need is often identified that an existing tank has deteriorated to the point of being a health risk and requires replacement with a new tank, compliant with current legislation.

Drawing upon the expertise of WRAS approved plumbers, design department and extensive experience in this field, SARENA are able to advise on suitable solutions and strategies.

Aside from the tank itself, SARENA are able to provide the following services as required:

- Removal and safe disposal of the existing tank
- Modifications or construction of tank support structure
- Tank installation
- Modification to existing pipework
- Lagging of pipework
- Clean and disinfection to the HSE's ACoP L8
- Commissioning

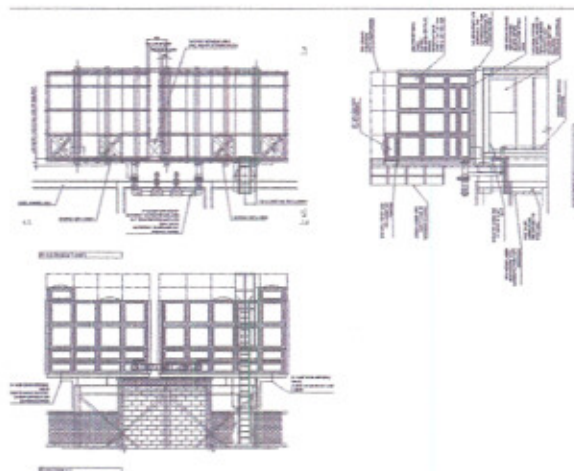

The above naturally takes in support functions including design drawings, schematics, on-site handling etc...

A key feature of such work is programme. The works often being required to be over a weekend or holiday shut-down with a seamless re-establishment of supply.

Employing contractors is often a concern to clients. SARENA directly employ all key site personnel to ensure the utmost control of site activities. The minimum of sub-contractors are used from a long-standing approved list. Training of SARENA employed site-workers includes: confined spaces, heights and slinging.

SARENA have successfully replaced tanks for clients in the public and private sectors including:

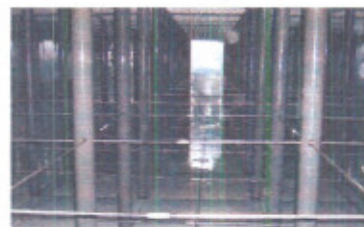

- NHS Trusts
- Councils
- Nursing Homes
- Hotels
- Schools
- Prison Services

- WRAS approved plumbers
- Long standing experience
- Full service available:
